'Bayou Corne Project'

State Troopers helicopter showed up this morning to fly Mr. Angelle over the area of interest  
in the swamp by Texas Brine Field --  
Mr. Angelle met on Texas Brine location along with DNR and other personnel to discuss  
the possibilities that could be causing this problem in the swamp --  
Went by the 4 1/2" csg stub and it's still bubbling around the base of the csg --  
The csg seems to be leaning over a little more -- A short clip of the bubbling and a picture  
of the stub will be E-Mail -- Made a trip to the csg stub in the wood (Ser # 41803) and there  
I didn't see any signs of bubbles or anything else --  
They made a trip in an airboat to the slurry area in the swamp to gather water and mud samples  
from in and around this area -- DEQ will be testing for TPHD - D.O.G and chlorides on the  
grab samples they took from this area --  
Crosstex was surveying their pipeline they found that 400' of their 36" pipeline had dropped  
16' and moved east 15' towards the sinkhole - All pipelines - Acadian Gas, Florida Gas and Crosstex  
is bleeding down their pipeline now -- Crosstex will have the line bleed down in 24 hrs. --  
Until the lines are bleed down the Sheriffs Dept. closed down Hwy 70 from Hwy 69 to Lee Dr. --  
Only opened to local traffic -- No through traffic across the pipeline that passes under the Hwy --  
Hwy 70 closed down around 7:00 pm --

Michael Theriot

5:30 am to 8:00 am = 2.5 hrs Over  
8:00 am to 4:30 pm = 8 Hrs Regular  
4:30 pm to 10:00 pm = 5.5 Hrs Over  
1/2 Hr off for Dinner  
Total Hrs = 16 Hrs
