By e-mail: rotte@norpc.org*

The Southeast Louisiana Clean Fuel Partnership (SLCFP) is an initiative of the U.S. Department of Energy supported by the Louisiana Department of Natural Resources to promote clean transportation fuels and technologies that can greatly contribute to our energy independence. The goals of the SLCFP are:

- Provide support and project coordination for fleets interested in transitioning to cleaner fuels;
- Create partnership between producers, distributors, retailers and users to increase the availability of cleaner fuels and technologies; and
- Educate our stakeholders as to current trends and opportunities.
